

Clark Forklift Part

Clark Forklift Parts - At present, there are over 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 in commission in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific components designed for 20 exclusive designs of forklifts and automated equipment. Your local Clark Seller is your complete source for availability of all your components needs provided by Clark Totalift.

Clark's phenomenal Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very impressive worldwide support network. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering safety features such as the operator restraint system. This exceptional dedication to safety is now a customary feature on every forklift.

Clark has a unyielding goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production plants. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a prevailing industry position.

Clark has selected the very economical and advantageous system of "Lean Manufacturing" for its assembly facilities and use of resources. This structure was developed to acknowledge the most efficient method of manufacturing facility stewardship and ensuring maximum efficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers join together to improve the efficiency and brilliance of their merchandise while minimizing expenses. The contemporary value engineering agenda combines progressive product improvement and delivers improved consumer support and service within the industry.
